

Image Classification :

Image Classification with Pre-trained MobileNet

Choose File dog-puppy...6966191.avif

Classify Image

Predictions:
golden retriever - 19.42%
standard poodle - 18.87%
cocker spaniel, English cocker spaniel, cocker - 14.37%

Lab Assignment 1 :

MobileNet Single Image Classification

Choose File dog-puppy...6966191.avif

Open console (F12) to see top-3 predictions.

Console

```
Loading MobileNet...  
MobileNet loaded  
Top-3 Predictions for selected Image:  
1. golden retriever - 36.66%  
2. Labrador retriever - 18.82%  
3. standard poodle - 16.59%
```

Lab Assignment 2 :

MobileNet Image Classification

Choose Files | dog-puppy...966191.avif

Open Console (F12) to see predictions

Choose File | No file chosen

Lab Assignment 3 :

Compare MobileNet (Classification) vs Coco-SSD (Detection)

Choose File | dog-puppy...0966191.avif

Compare Models

MobileNet Best Classification:
golden retriever - 25.81%

Coco-SSD Top Detection:
dog - 95.71%

Result:
MobileNet classifies the whole image into a category.
Coco-SSD detects objects and labels them.
Both are pre-trained and suitable for browser-based vision tasks.
